Make a cake

Activity intended for:
Grades 1-4

Subject/area of development:
Cognitive intelligence,
mathematics, spatial insight

Language

Mathematics

Music

Identity

Duration:

30 - 45 minutes

Material:

Creall Therm Junior

Purpose of the lesson:

The children will do an assignment which requires insight and an independent approach. This assignment can be carried out individually or in small groups.

Method:

The children are given the assignment to make a cake which must meet the following requirements: the cake has two layers, each of a different color. There are 8 candles on the cake, and 4 flowers between the candles. The children can add their own decorations on or around the edge of the cake. The assignment is written on the board, so that the children can check it while they work.

Extension:

Have the children create their own cake with specific features. Discuss the importance of each aspect, as well as the number significance.
